

# Are you ready for the winter darkness?

**Do you want to save money this winter?  
Do you want to keep your people healthy, happy and  
productive?**

Do you want to improve client and customer patronage?

Reduce winter blues and staff absenteeism?

Reduce the risk of work place accidents?

Is your work place OSH compliant? Does it meet minimal health and safety levels of illumination, in all work place areas including office, and public areas?

People that work in well lit areas have a cheerier outlook on life and fewer health problems, therefore less absenteeism, and fewer work place accidents.

**Happier, healthy people** means less down time, and **happier customers**.

Did you know that old fluorescent lamps lose up to 40% of their light output after 2 years.

Are you getting what you should out of your lighting systems?

**Let us help you and your staff “see the light” with these  
autumn specials.**

**Only until the end of May!**

**Fluorescent light fittings re-lamped for only \$10.83 + GST per lamp**

(including lamp, S10 starter, and labour)

**And receive a free lighting lux level check, in your workplace.**

**CONTACT SHIRE ELECTRICAL Ltd**

**WHILE STOCKS LAST**

**Phone Mark 09-415-3111**
